

Where will the frog end up?

Write in the numbers

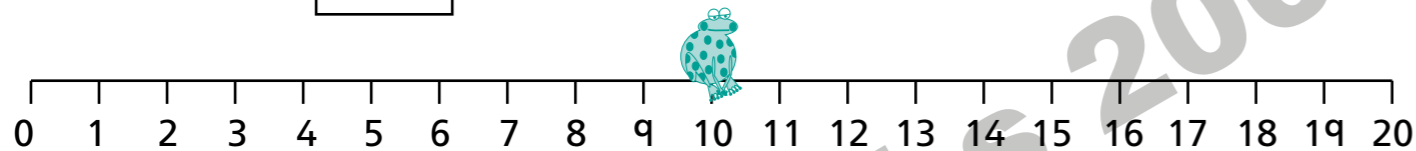

count on 3

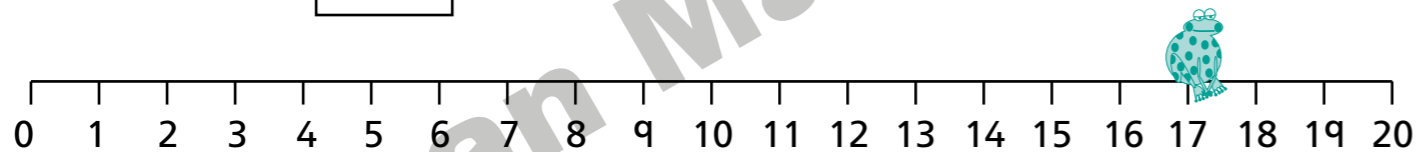

count back 2

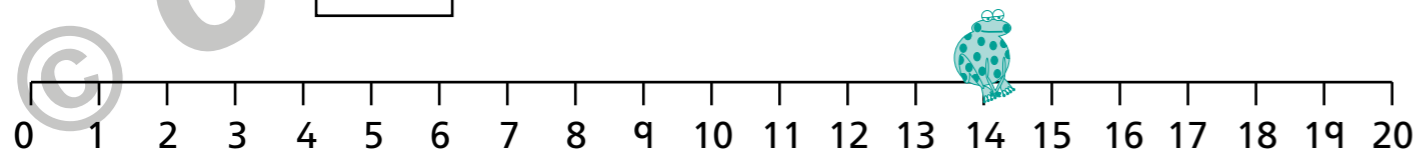

count on 4

count on 2

count back 3

Remember to take your homework to school to show your teacher.

Your teacher will give you this homework sheet back, so you can keep it at home to play again and again!

Counting and comparing

Name

Children learn best about numbers when they are doing things they find interesting. The games and activities on this homework sheet will help your child with counting on and with comparing numbers. Your child will practise:

- counting and comparing sets of counters
- counting on and back along a number line

Learning is far more successful if it's fun, so be enthusiastic and help your child enjoy the maths. The homework sheets always involve mathematical activities, games and puzzles to be shared. The emphasis is on enjoyment, exploration and discovery.

Beans in the pot

a game for 2 players

You need

- 10 double-sided counters (red and white)
- a pot

Decide who is Red and who is White.

Put all the counters into the pot and shake it.

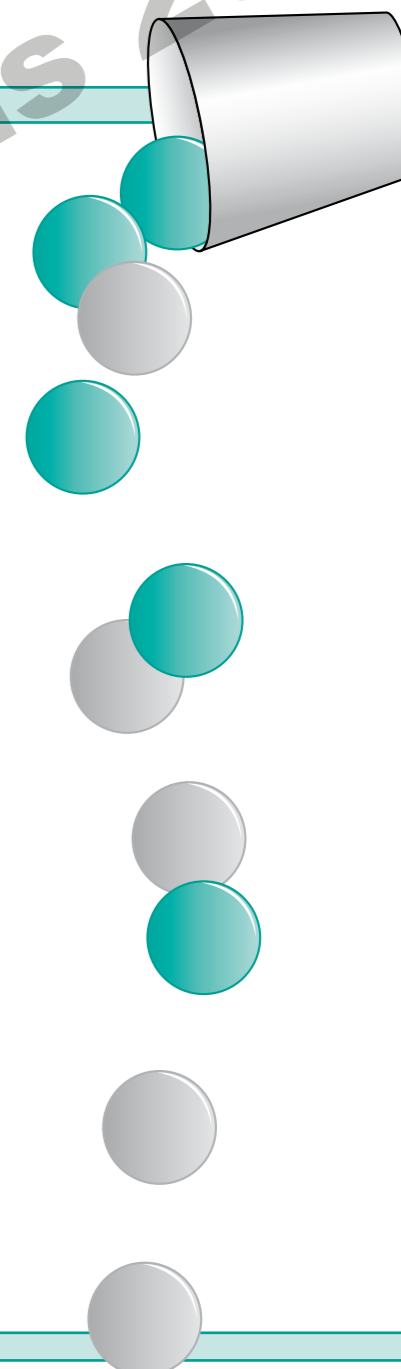

Spill the counters onto the table.

Count how many white counters and how many red counters you can see.

If there are more reds, the Red person wins **one** counter. If there are more whites, the White person wins **one** counter. If there are the same number, nobody wins.

Put the rest of the counters into the pot and start again.

Go on until all the counters have been won.

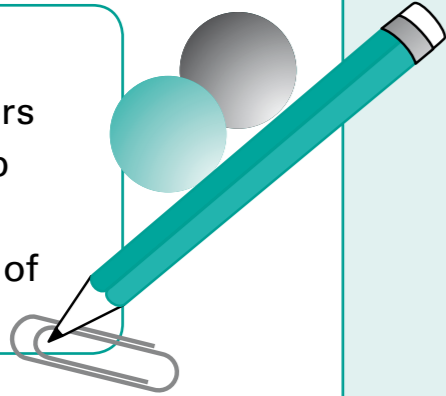

Catch the fly

a game for 2 players

You need

- two counters
- a paper clip
- a pencil
- five scraps of paper

You are both frogs. The scraps of paper are flies, which you are trying to catch.

Before you start

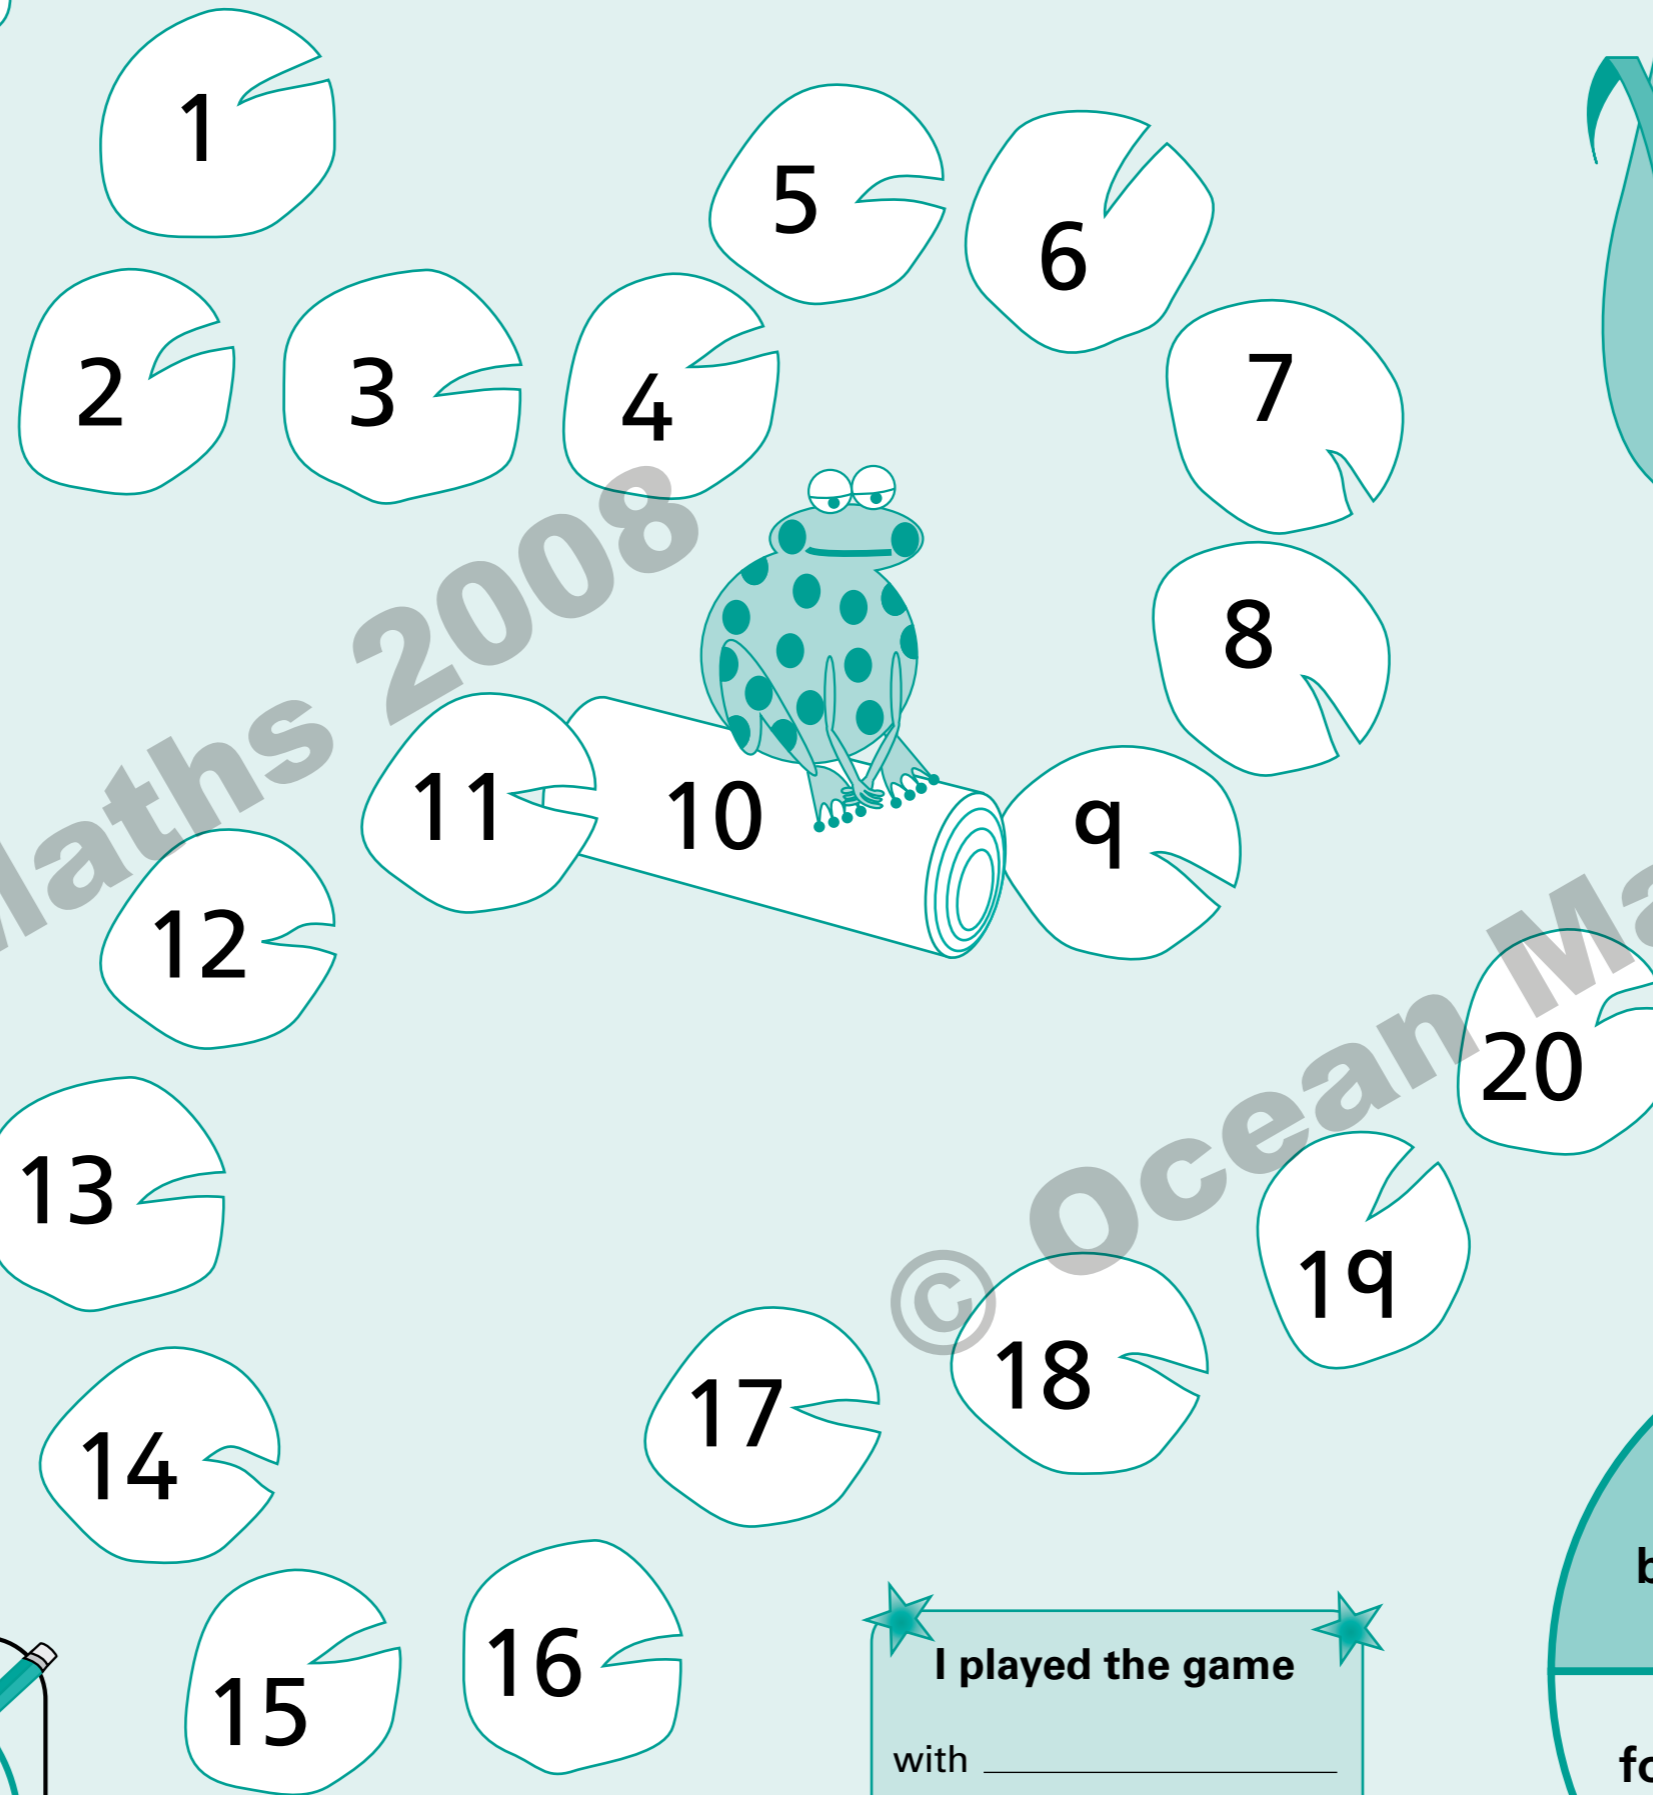

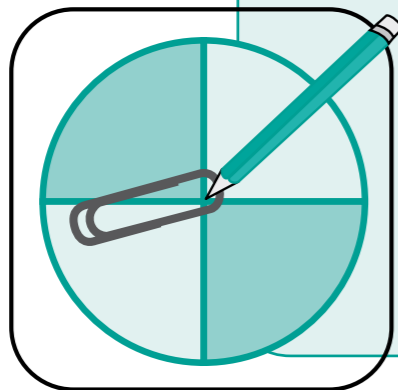

- put the flies on any five numbers (except 10)
- put your counters on the log (number 10)

Take turns to

- spin the spinner
- move your counter as the spinner tells you
- if you land on a fly, take it

When one of you reaches 1 or 20 the game is over.

Whoever has most flies is the winner.

Remember to read the instructions before you play the game
